

SUMMARY

Recent graduate in Computer Science with academic and practical experience in software development, application development, and systems engineering. Demonstrated ability in technical support and troubleshooting through hands-on internships involving internal system maintenance, user-facing web applications, and automated workflows. Skilled in collaborative environments using Agile tools like Jira and Confluence, with foundational exposure to ITSM tools, Microsoft 365, user onboarding, and Windows-based environments. Currently pursuing a Graduate Program in IT through Swinburne University, aligning with Service Desk and IT Support roles.

EXPERIENCE

Site Manager | FLYMOTION

04/2025 to 04/2026

- Oversaw daily operations, optimizing resources to achieve 10-15% improvements in team efficiency.
- Led teams to meet project deadlines while maintaining or exceeding quality standards.
- Ensured 100% safety compliance through regular audits and accurate reporting.

Room Attendant | Mantra Epping

11/2023

- Maintained exceptional cleanliness and organization in high-traffic areas, ensuring a safe and welcoming environment for guests.
- Managed daily room cleaning and turnaround for a high-volume hotel, consistently meeting tight deadlines and operational requirements.
- Complied with all health and safety standards, contributing to successful inspections and maintaining a hazard-free workplace.

Intern | Turtle Down Under

- Developed and maintained internal systems and web applications using PHP, MySQL, and WordPress, enhancing platform stability and scalability.
- Customized WordPress with plugins, admin modifications, and small front/backend upgrades to meet specific business needs.
- Worked with REST APIs for integrations, data management, and endpoint testing to streamline connections across systems.
- Automated workflows through CSV processing, scripting, and cron jobs, boosting operational efficiency.
- Assisted in creating AI-based tools to automate processes and improve decision-making with data insights.
- Supported in-house projects like a custom CRM system and AI-driven automation, gaining hands-on development experience.

Software Developer | Swinburne Rover Team Club

03/2025 to 01/2026

- Developed and maintained internal systems and web applications using PHP, MySQL, and WordPress, enhancing platform stability and scalability.
- Customized WordPress with plugins, admin modifications, and small front/backend upgrades to meet specific business needs.
- Worked with REST APIs for integrations, data management, and endpoint testing to streamline connections across systems.
- Automated workflows through CSV processing, scripting, and cron jobs, boosting operational efficiency.
- Assisted in creating AI-based tools to automate processes and improve decision-making with data insights.
- Supported in-house projects like a custom CRM system and AI-driven automation, gaining hands-on development experience.

EDUCATION

Secondary School Education | St Monica’s College Epping

2017 to 2022

Completed secondary education with a focus on foundational subjects, preparing for higher education in technology and Application Development.

Diploma of Information Technology (Uni-Link) | Swinburne University of Technology

2023 to 2023

Focused on information technology principles, providing a pathway to advanced studies in computer science, including Software Engineering, Networking fundamentals, and basic Windows system administration.

Bachelor of Computer Science | Swinburne University of Technology

2024 to 2025

Continuing into Year 3, emphasizing software development, artificial intelligence, machine learning, and Systems Engineering principles, with coursework aligned to Application Development, Technical Consulting, and foundational IT support concepts including Microsoft 365 and Windows environments.

SKILLS

Git/Github version control	Software Deployment	Technical Support
Troubleshooting	Collaborative	User Onboarding
Programming Languages	Application Development	Software Engineering
Test Engineering	ITSM tools	Microsoft 365
Technical Consulting	Software Engineering	Test Engineering

LANGUAGES

Chinese	English
Limited working	Native or bilingual
